Professional Profile

- I am an undergraduate student with experience in the hospital and in the dental office and who has a desire to apply these skills into dental medicine. I am a biology major at the New Jersey Institute of Technology and have an expected graduation in May 2019.

Internship Experience

Sylvan Dental Care

Intern Summer 2015-Summer 2017

Dr. Dong H. Lee 1-201-608-7000

- I started to shadow Dr. Lee and Dr. Kim in the summer of 2015. I learned to clean, sterilize, and organize dental tools and to set up rooms for each new patient. I shadowed for 3 summers, working for 8 hours a day, 2 days a week, 8 weeks per summer. I was able to learn from shadowing Dr. Lee and Dr. Kim observing not only many different dental operations but also learn how to interact with patients and fellow dentists. Due to the diverse practices Sylvan Dental Care, I was able to observe different fields of dentistry including endodontics, periodontics, orthodontics, and general dentistry while being able to see different operations such as denture fittings, composite fillings, root canals, extractions, implants, crownings, and wisdom teeth removals.

Jersey Shore University Medical Center, Department of Neurosurgery

Fall 2015

- Due to the unique mentorship program that Academy of Allied Health and Science offered, I was able to shadow a P.A and observe a neurosurgeon. For 8 weeks, I was able to come into the Jersey Shore University Medical Center 3 times a week for 4-5 hours a day. I was able to observe different procedures on the spine and brain, including craniotomies and lumbar spinal fusion operations. I was able to learn about the hospital environment, interacting with surgeons, P.A's, nurses, and patients. I also was able to learn how to analyze and read CAT scans, PET scans, and MRI scans.

Education

New Jersey Institute of Technology

Bachelor of Art in Biology May 2019

- GPA: 3.882/4.0
- Albert Dorman Honors Scholar
- 7 year BA/DMD program with Rutgers School of Dental Medicine

Rutgers School of Dental Medicine

Expected to start September 2019

Expected Graduation May 2023
